

## 2500 Circuit Description

1.2500 is the main board of 69547. It contains a microchip which style is AT89S52, the Y1 is generated the 11.0592MHz clock signal to it.

2.69647 include 2500 main board, 0310 display board, and 1901 EMI board. Display board and IGBT controlled by main board.
